Is Your Department

OBTAINING ITS SHARE OF CONFESSIONS?

Although there are many disputes about criminals, there is general agreement that more of them today are "keeping their mouths shut".

It appears that most criminals are from Missouri – they have to be shown, and correctly interrogated, before they will confess. One of the most effective ways of showing them is by a polygraph examination.

Police chiefs have reported over 50 per cent confessions–when they have used one of their men properly trained in both polygraph procedures and polygraph interrogation.

At the National Training Center of Lie Detection not only are policemen taught proper polygraph procedures, but also 40 hours are devoted to polygraph interrogation.

If your department is not getting as many confessions as you would like, write–today–for Bulletin C.
